

CS3 Three Phase SSR Quick Start Manual

0037-75554 (PK528)

This manual is intended to provide only the basic installation and operation instructions for the CS3 Three Phase Solid State Relay. Please refer to manual PK522, for complete installation & operation details. The most current revision of PK522 may be found on the Chromalox website: www.chromalox.com

1. IMPORTANT SAFEGUARDS

WARNING

ELECTRIC SHOCK HAZARD: Read and understand all instructions before installing, servicing or operating this controller. Failure to do so could result in equipment or property damage as well as personal injury and even death.

WARNING

HIGH VOLTAGE is used in the operation of this equipment. **DEATH ON CONTACT** may result if personnel fail to observe safety precautions. Learn the areas containing high-voltage connections when installing or operating this equipment.

WARNING

Be careful not to contact high-voltage connections when installing or operating this equipment. Before working inside the equipment, turn power off and ground all points of high voltage potential before touching.

WARNING

ELECTRIC SHOCK HAZARD. Any installation involving control equipment must be performed by a qualified person and must be effectively grounded in accordance with the National Electrical Code to eliminate shock hazard.

CAUTION

The Owner/Installer must provide all necessary safety and protection devices and follow all current electrical wiring standards and regulations. Failure to do so may compromise the integrity of the controller and/or cause product failure resulting in a safety risk to operational service and personnel.

CAUTION

This controller utilizes a heat sink which is designed to cool the unit during operation. Under no circumstance should air flow around the controller be compromised in any way. Failure to do so may result in the overheating of the controller, product failure, product temperatures and even fire.

WARNING

During continuous operation, the heat sink can reach a very high temperature, and keeps a high temperature even after the unit is turned off due to its high thermal inertia.

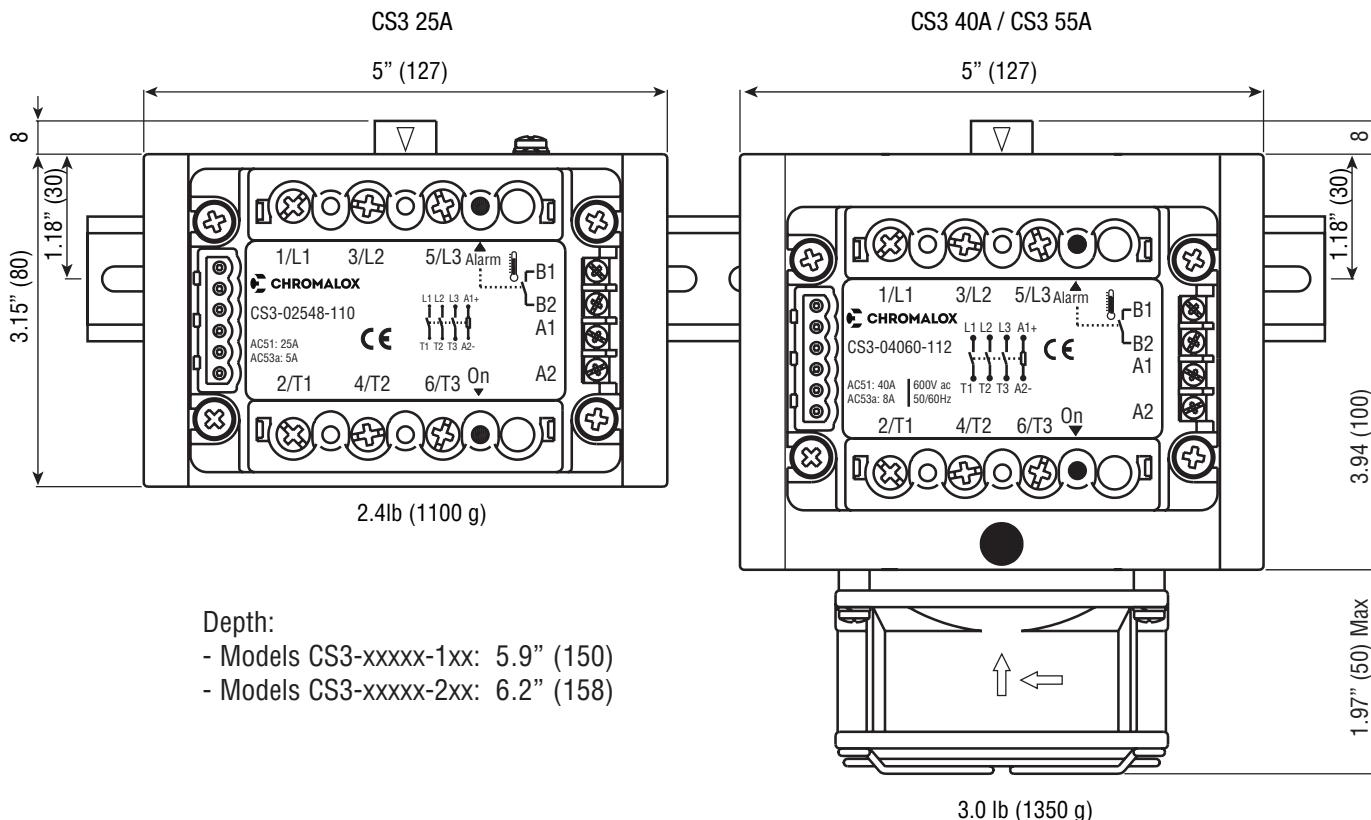

Higher voltages may be present. DO NOT work on the power section without first disconnecting electrical power to the panel. Failure to do so could result in serious injury or death.

2. INSTALLATION - MECHANICAL

To ensure proper performance, maximum safety and reliability, it is essential to install the unit correctly. This includes proper mounting, spacing, hardware and wiring. See below:

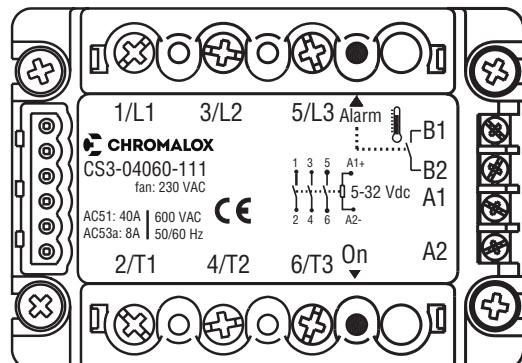

1. Maximum surrounding air temperature is 40°C in "Open Type Equipment" which is suitable for use in pollution degree 2.
2. Install the unit vertically (max 10° inclination from vertical axis).

Dimensions & Weights

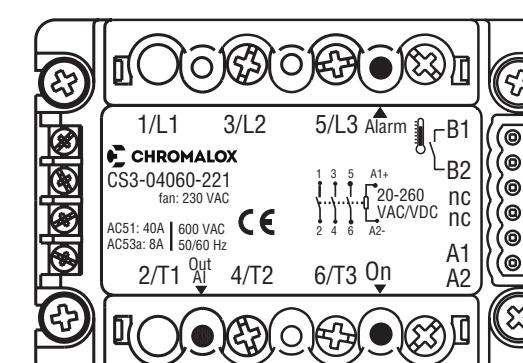

3. INSTALLATION - ELECTRICAL CONTROL, LOAD & LINE CONNECTIONS & LED INDICATION

CS3 with VDC Control Signal Input

Label	Connection/Indication	Label	Connection/Indication
L1, L2, L3	Line 1, Line 2, Line 3 VAC Input	B2	Alarm Output (Option)
T1, T2, T3	Load 1, Load 2, Load 3 VAC Input	ON	Red LED - Command Signal Indication
A1	(+) VDC Control Signal Input	ON	Red LED - Command Signal Indication
A2	(-) VDC Control Signal Input	Alarm	Yellow LED - Over Temp. Indication
B1	Alarm Output (Option)	GND	Earth Ground (Not shown, varies by model)

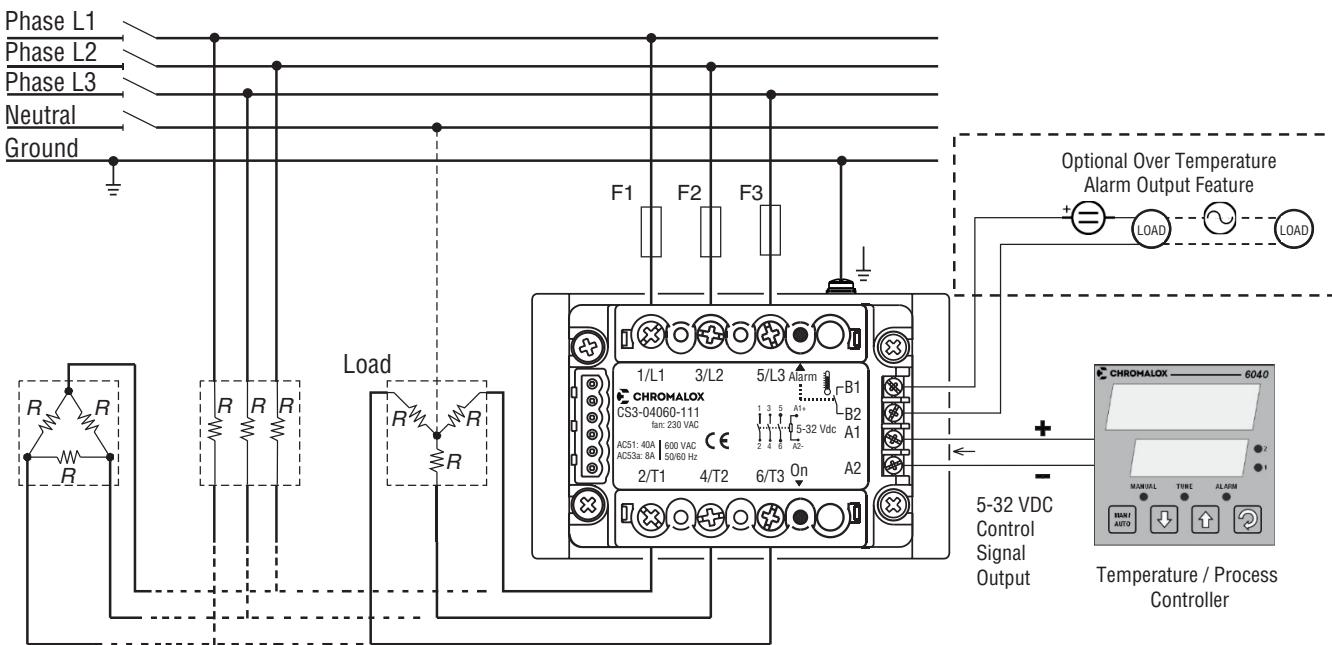

CS3 with VAC Control Signal Input

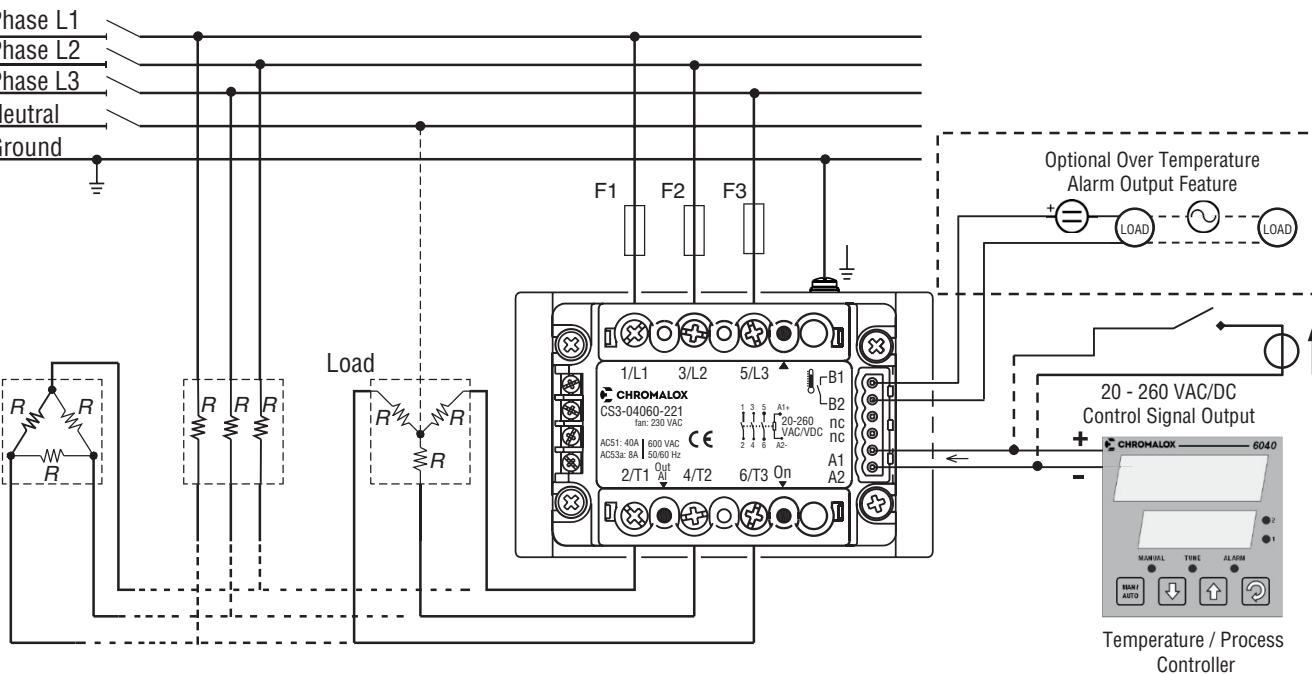

Label	Connection/Indication	Label	Connection/Indication
L1, L2, L3	Line 1, Line 2, Line 3 VAC Input	ON	Red LED - Command Signal Indication
T1, T2, T3	Load 1, Load 2, Load 3 VAC Input	Alarm	Yellow LED - Over Temp. Indication
A1, A2	AC Control Signal Input	OUT-AL	Red - LED Load/Line Interrupt Alarm (Alarm Code 2 Only)
B1	Alarm Output (Option)	GND	Earth Ground (Not shown, varies by model)
B2	Alarm Output (Option)		

4. WIRING - LOAD, LINE, INPUT SIGNAL AND OPTIONAL ALARM

CS3 Wiring with VDC Control Signal Input

CS3 Wiring with VAC/VDC Control Signal Input (Code 2)

5. SPECIFICATIONS

General

Category of use:.....AC51, AC53a
Switching Mode:.....Zero Cross
Input/Output Isolation Voltage:.....4,000 VAC RMS
Operational Voltage Range
• 480 VAC models:.....24 - 530 VAC
• 600 VAC models:.....24 - 660 VAC
Nominal Frequency:.....50 - 60 Hz
Non-repetitive peak voltage
• 480 VAC models:.....1200 Vp
• 600 VAC models:.....1200 Vp
Zero Voltage Turn-on:.....≤ 20V
Activation time:.....1/2 cycle
Deactivation time:.....1/2 cycle
Potential drop at rated current:.....< 1.4 Vrms
Power factor:.....1
Protection:.....IP20

Inputs

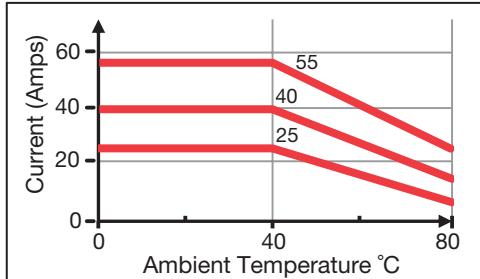

VDC Input (Type "1")
Control voltage:.....5 - 32 VDC
Maximum input:.....< 18 mA @ 5 VDC to 22 mA @ 32 V
Maximum reverse voltage:.....36 VDC
Activation voltage:.....> 4.5 VDC
Deactivation voltage:.....< 3 VDC VAC
Input (Type "2")
Control voltage:.....20 - 260 VAC/DC
Activation voltage:.....> 15 VAC/DC
Deactivation voltage:.....< 6 VAC/DC
Current draw:.....≤ 8 mAac/dc @ 260 VAC/DC

Integrated Thermal Protection

The SSR temperature is constantly monitored. If the maximum temperature limit (230°F/110°C) is exceeded, current to the load is interrupted and the YELLOW over-temperature condition LED illuminates.

Outputs

Specification	CS3-025		CS3-040		CS3-055			
Rated Current (@ 40°C continuous service)	AC51	AC53	AC51	AC53	AC51	AC53		
	3 X 25A	3 X 5A	3 X 40A	3 X 8A	3 X 55A	3 X 15A		
Maximum Surge Current (t=20 ms)	400 A		600 A		1,150 A			
Maximum I ² t for fusing (blowout)	645 A ² s		1,010 A ² s		6,600 A ² s			
Critical dV/dt Off-state (minimum)	1,000 V/μs							
Off-state Leakage Current (@ Rated Voltage)	< 3 mA							

CS3-025, CS3-040 & CS-055 Derating Curves

Rated Current versus Ambient Temperature
Note: Models as tested with approved heat sinks and fans, if applicable.

Environment Conditions

Operating Temperature Range:.....-20°C to 80°C
Max. Relative Humidity:.....50% @ 40°C
Max. Installation Altitude:.....2000m above sea level
Pollution Level:.....2
Storage Temperature:.....-20°C to 85°C
Junction Temperature:.....125°C

This device conforms to ECC 2004/108/CE and 2006/95/CE and subsequent modifications including with reference to product standard EN 60947-4-3 (Low-voltage switchgear and control gear – AC contactors and semiconductor motor starters). The product is designed for type A environments. Use of the product in type B environments may cause undesired electromagnetic noise. In this case, the user should take appropriate steps for improvement.
