

ADH & ADHT Series High Temperature Air Duct Heaters

- 5 - 300 kW
- 240 and 480 Volt, Three Phase (Up to 600V Available)
- INCOLOY® Sheath Elements
- 800°F Max. Outlet Air Temp. (ADH)
- 1200°F Max. Outlet Air Temp. (ADHT)

Applications

- Heat Air for Drying and Curing operations up to 1200°F Air Temperature
- Heat Treating
- Reheating or Dehumidification
- Aircraft Manufacturing
- Autoclaves
- Annealing
- Drying
- Paint Baking or Drying
- Sterilizing

Features

Long Life Metal Sheath Tubular Elements

— High grade INCOLOY® sheath material for excellent corrosion/oxidation resistance at high operating temperatures.

Sturdy Metal Sheath Elements minimize problems associated with open coil resistance wire units.

High Purity Magnesium Oxide — The elements are filled with highest purity blends of magnesium oxide refractory (MgO) compacted to a rock hard density to ensure good thermal conductivity and electrical insulation resistance.

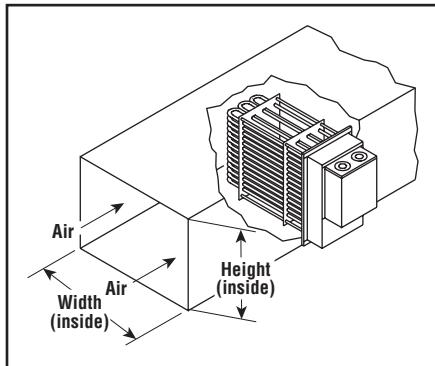

Superior Grade Resistance Wire — The heart of each heating element is made of high quality resistance wire for maximum life.

Low Watt Density Resistor Wire — Watt density on the heating coil is designed for low watt density operation by increasing the coil and wire diameter, and length of resistance wire to give maximum surface area and low operating coil surface temperature — providing longer coil life.

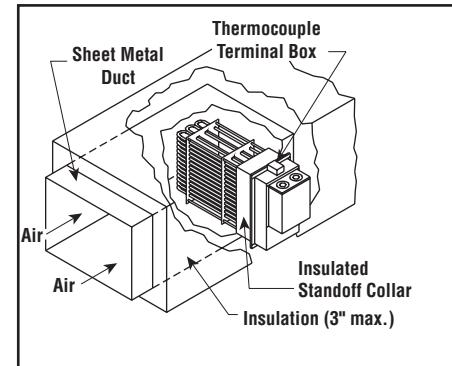

Superior Construction at Element Bends — All element bends are repressed in hydraulic

ADH — Typical Installation

ADHT — Typical Installation

presses after bending to assure recompaction of refractory material to eliminate hot spots and electrical insulation voids.

Low Wiring Compartment Temperatures

Made possible by the addition of a one inch thick blanket of insulation in the terminal box. High temperature ADHT units include an additional three inches of insulation to help reduce duct heat losses.

Meets NEC Wiring Requirements — Heaters are subdivided into 48 Amp maximum circuits in compliance with the National Electrical Code.

Easy Access to Field Wiring Terminals — Terminal housing is completely removable for maximum access to field wiring terminals. Individual terminal blocks with threaded stud type terminals are provided for each circuit to permit quick positive attachment of circuit wiring conductors.

Dirt & Dust Resistant Terminal Housing — Made of solid heavy gauge aluminized steel, rather than perforated metal, to resist dirt and dust accumulation on the electrical connections and thus provide longer service life.

Flange Mounting Gasket — Packed separately with each duct heater to minimize air leakage between the flange and air duct.

Tandem Mounting — Multiple heaters may be mounted in tandem with each other provided the maximum recommended outlet air temperature is not exceeded.

Element Support Plate — A stainless steel element support plate is held in place with Stainless Steel support rods to provide structural stability.

Pressure Drop — See Pressure Drop Curve G-227-2 under Air & Gas Data in the Technical section of this catalog.

Options

Gas Tight Design — Threaded fittings with fiber washers attach heating elements to flange — prevents leakage of ducted air into terminal housing.

Overtemperature Protection — Thermocouple welded to the element sheath surface and wired to a terminal block allows for accurate overheat protection. Standard Type K thermocouple on ADHT high temperature heaters.

Thermocouple Sensor for air temperature control.

Moisture or Explosion-Resistant Terminal Enclosures are available for those applications requiring special terminal protection. Explosion-Resistant enclosure design meets requirements for Class I, Div.2, Group D area but does not carry any third party listing.

CAUTION — If atmosphere in duct contains combustible gases or vapors, sheath temperatures must be limited not to exceed 80% of the ignition temperature of the gas or the vapor involved. Check with your Local Chromalox Sales office for recommendations.

Special Ratings, Sizes or Construction

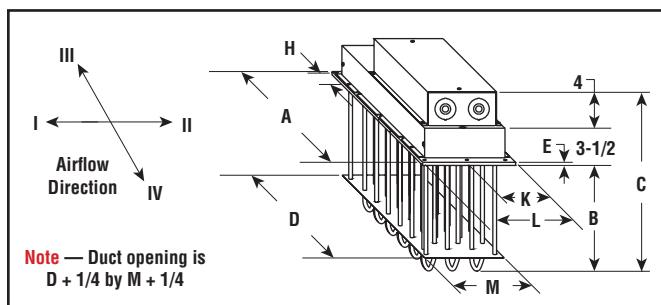

Materials — Chromalox can fabricate a duct heater to your special rating, physical size or other specifications.

Application Assistance — Chromalox will assist you in the design or selection of equipment. Contact your Local Chromalox Sales office.

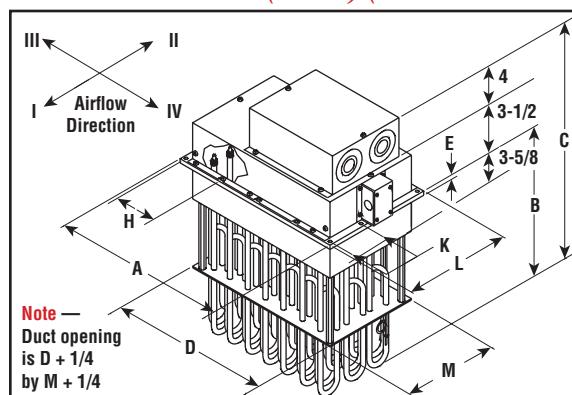

ADH & ADHT Series

High Temperature Air Duct Heaters (*cont'd.*)

ADH - Dimensions (Inches) (See Dimensional Table)

ADHT - Dimensions (Inches) (See Dimensional Table)

ADH-270	-	270	90	33-5/8	35	42-7/8	32	3/8	5-1/2	3-7/8	20	18-3/8
-	ADHT-300	300	90	33-5/8	35	42-7/8	32	3/8	5-1/2	3-7/8	20	18-3/8

All Heaters can be mounted in any position; top, side or bottom entry. In high ambient temperature operations, least corrosive action and least oxidation to the terminals will occur if heaters are mounted with terminals in the coolest possible ambient, usually on bottom or side of duct. Minimum duct size is A or L dimension plus 3/8" and B dimension plus 1-5/8", and 3" for insulation housing.

Electrical Table for ADH and ADHT Duct heaters

Number of Circuits

KW	No. Elements	240V 1 Ph	240V 3 Ph	480V 1 Ph	480V 3 Ph
5	3	1		1	1
10	6	1	1	1	1
15	9	3	1	1	1

25	15	3	2	2	1
30	18	3	2	3	1
35	21	X	3	2	1
40	24	X	3	2	2
45	27	X	3	3	2
50	30	X	5	3	2
60	36	X	X	X	2
70	42	X	X	X	4
80	48	X	X	X	4
90	54	X	X	X	5
100	60	X	X	X	5
120	36	X	X	X	4
126	42	X	X	X	4
144	48	X	X	X	4
160	48	X	X	X	8
162	54	X	X	X	6
180	54	X	X	X	6
216	72	X	X	X	6
240	72	X	X	X	8
270	90	X	X	X	8
300	90	X	X	X	10

All standard circuits are maximum of 48 Amps
For other # of circuits/amps per circuit consult factory
X denotes not standard

For selecting the proper control panel for use with the ADH and ADHT duct heaters, the number of circuits is of crucial importance. The Electrical table, at right, should be used for the purpose of determining the number of circuits in the panel.

Field Wiring — Refer to Graph ADHTB Terminal Box Temperature field wiring selection guide in the technical section of this catalog (Section I).

Gas tight construction should be considered if the gas pressure in the duct is at a higher relative pressure than in the terminal box which is at room air pressure. Refer to ADH/ADHT terminal box temperature and field wiring selection guide showing the temperature in the terminal box at various gas outlet temperatures. This guide is graph ADHTB located in the Air and Gas Heating section in the technical pages in the back of the catalog.

ADH

High Temperature Air Duct Heaters

- **5 - 270 kW**
- **240 and 480 Volt, Three Phase (Up to 600V Available)**
- **INCOLOY® Sheath Elements**
- **30 W/in²**
- **800°F Max. Outlet Air Temp.**

Construction

Rugged Construction Elements — Sturdy 0.475" diameter INCOLOY® sheath tubular elements are mounted to a heavy 1/4 or 3/8" thick steel flange. Element fasteners allow for easy replacement.

Corrosion-Resistant Terminal Enclosure — The element terminal enclosure is made of 16 gauge high-temperature, corrosion-resistant steel and includes 1" thick high-temperature insulation to minimize temperatures in the wiring area.

Wiring Box — The 16 gauge wiring box encloses individual terminal blocks for each circuit. Threaded stud type terminals are provided to permit quick positive attachment of circuit wiring conductors.

Mounting

All Heaters can be mounted in any position; top, side or bottom entry. In high ambient temperature operations, least corrosive action and least oxidation to the terminals will occur if heaters are mounted with terminals in the coolest possible ambient, usually on bottom or side of duct. Minimum duct size is A or L dimension plus 3/8" and B dimension plus 1-5/8".

Application & Selection Guidelines

Maximum Work Temperatures — Type ADH heaters can generally be used at the following maximum temperatures, provided the minimum air velocity is maintained uniformly through the heater.

Air Velocity (Ft./Sec.)	Max. Outlet Air Temp. (°F)
4 - 36	800

Note — Maximum temperatures are based on 30 W/in². If elements have a lower watt density, work temperature may be increased; if watt density is higher, work temperature should be lower.

Note — An airflow type switch or other device is recommended to protect against loss of airflow.

Note — See Allowable Watt Density & Heater Selection Graphs in the Technical section of this catalog.

ADHT

High Temperature Air Duct Heater

- 5 - 300 kW
- 240 and 480 Volt, Three Phase (Up to 600V Available)
- INCOLOY® Sheath Elements
- 20 W/in²
- 1200°F Max. Outlet Air Temp.
- Insulated Standoff Collar

Type ADHT

Construction

Rugged Construction Elements — Sturdy 0.475" diameter INCOLOY® sheath tubular elements are mounted to a heavy 1/4 or 3/8" thick steel flange. Element fasteners to allow for easy replacement.

Corrosion-Resistant Terminal Enclosure — The element terminal enclosure is made of 16 gauge high-temperature, corrosion-resistant steel and includes 1" thick high-temperature insulation to minimize temperatures in the wiring area.

Wiring Box — The 16 gauge wiring box encloses individual terminal blocks for each circuit. Threaded stud type terminals are provided to permit quick positive attachment of circuit wiring conductors.

Insulation Housing — Includes 3" of high temperature thermal insulation to reduce duct heat conducted into terminal enclosure.

Overtemperature Protection — A type K thermocouple is welded to the element sheath surface to sense element temperature, and is wired to a terminal block located on the outer surface of the terminal housing.

Mounting

Generally mounted to a field fabricated stand off collar from the ductwork to position the heater such that the 3" insulation housing is in the same plane as the duct insulation.

All Heaters can be mounted in any position; top, side or bottom entry. In high ambient temperature operations, least corrosive action and least oxidation to the terminals will occur if heaters are mounted with terminals in the coolest possible ambient, usually on bottom or side of duct. Minimum duct size is A or L dimension plus 3/8" and B dimension plus 1-5/8", and 3" for insulation housing.

Application & Selection Guidelines

Maximum Work Temperatures — Type ADHT heaters can generally be used at the following maximum temperatures, provided the minimum air velocity is maintained uniformly through the heater. Maximum temperatures are based on 20 W/in².

Air Velocity (Ft./Sec.)	Max. Outlet Air Temp. (°F)
4	1050
9	1100
16	1150
25	1200
36	1200

Note — See Allowable Watt Density & Heater Selection Graphs in Technical section.

Note — An airflow type switch or other device is recommended to protect against loss of airflow.
