

HEALTHCARE

ELECTRIFICATION OF HEATING SYSTEMS

Approximately 5% of the global emissions footprint comes from hospitals, with one of the major contributors being electricity and heating of healthcare estate. Chromalox electric heating solutions provide a way for you to improve efficiency of existing systems while helping reduce energy consumption and lower carbon emissions. Chromalox empowers healthcare facilities to meet their sustainability goals through zero emission electric hot water and steam generation on a scale beyond conventional limits.

- Eliminates on site Scope 1 Emissions
- Eliminates Scope 2 Emissions when coupled with renewable power
- Drastically reduces maintenance costs & downtime
- Virtually 100% efficient conversion of energy to usable heat
- Removes complexity & cost of combustion sources
- Significant savings in life cycle costs

LOW VOLTAGE TECHNOLOGY (12V UP TO 600V)

HEAT TRACE SYSTEMS

STEAM GENERATORS

STORAGE TANK HEATERS

CIRCULATION HEATERS

MEDIUM VOLTAGE TECHNOLOGY (1000V UP TO 7200V)

HEAT TRANSFER SYSTEMS

HOT WATER/STEAM GENERATORS

POWER CONTROL ASSEMBLIES
