

SUBMITTAL SHEET CPHH PUMP HOUSE CONVECTION HEATERS

Capacities
500 Watts
1,706 Btuh
120V, 240 V
Single Phase
Built-In Controls

SUGGESTED ENGINEERING SPECIFICATIONS

CONSTRUCTION

Enclosures shall be constructed of reinforced 18 gauge steel to withstand heavy-duty, commercial-institutional use. Grilles shall be closely spaced to restrict entry of foreign objects.

HEATING ELEMENT

Heating elements shall be steel sheath, enclosed, non-humming, fin-tubes, finished with high temperature corrosion resistant paint.

THERMAL PROTECTION

Thermal overheat protection shall be line voltage type with automatic reset to turn heating elements off should overheating occur. Operation shall automatically restore when cause for overheating is eliminated. Models with suffix M in the model number include an additional manual reset cutout.

CONTROLS

Heater to include an adjustable thermostat (40 - 100°F)

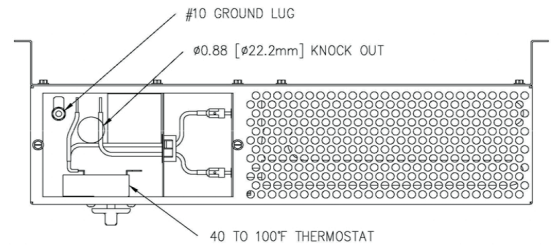

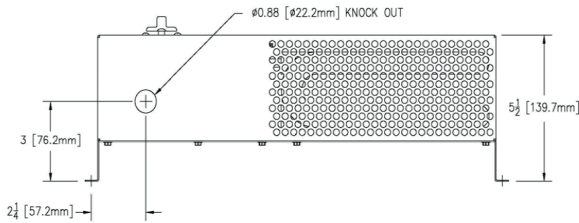

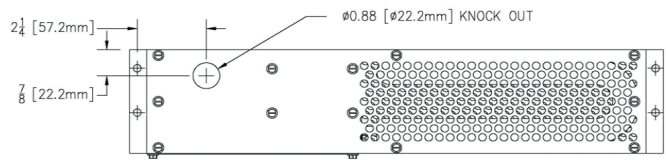

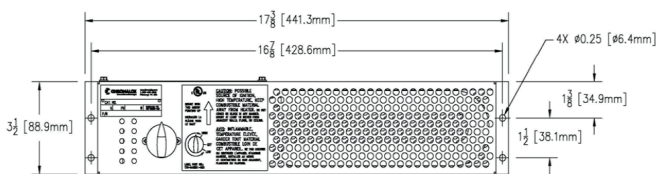

FINISH

Enclosure shall be chemically treated to resist corrosion and finished in Almond color powder coat paint.

Each heater shall be completely factory assembled, wired, tested and shipped as a single assembly to eliminate job-site confusion and loss of parts, and to speed installation.

All cabinet convectors and electrical accessories shall be ETL listed to UL and CSA standards.

Finish shall be corrosion and temperature resistant to retain appearance throughout years of usage.

Limited Warranty:

Please refer to the Chromalox limited warranty applicable to this product at <http://www.chromalox.com/customer-service/policies/termsforsale.aspx>.
